## Quarta® Organisational Model

**Quarta®** - Organisational Model accompanies and integrates the Human Resources module in the definition and catalogue of business processes.

In this way, it is possible to immediately identify:

- the persons in charge;
- process inputs and outputs, establishing the aims to be achieved for each single process;
- typical activities of the process;
- one or more indicators that "measure" each process in real time.

The system is based on three levels: positions, task, typical activity. Possibility of relating each level with:

- competences
- tasks;
- standard activities;
- resources;
- quality aims and quantity targets to be achieved;
- new indicators for each request.

**Quarta®** allows to graphically put in evidence one's own organisation:

- through surfers, assuring at any moment an updated overview of its own structure, from different viewpoints. (hierarchies, positions, competences, aims, etc...);
- through the integration with the main creation tools of organisation charts/charting (Microsoft Visio®, OrgPublisher etc...).
