Oracle-Hyperion®

Among the data query and analysis solutions currently present on the market, it surely is the fully-developed and at the same time the easiest to use.

With Oracle-Hyperion®, operative managers, analysts and employees have a simple and immediate access to the information through the Web, by means of simple and direct dashboards.

The data contained in the different databases of the business information system are transformed in immediately usable information, in full safety, by all the internal and external actors that interact with the company.

Oracle-Hyperion® enables the understanding and sharing process of business openings and trends, which is essential today to quickly take informed and conscious decisions at all business levels.

Highlights

- Query and sophisticated analyses.
- Extremely user-friendly user interface.
- Support for all kinds of users.
- Quick distribution and high scalability.
- Easy management and reduced maintenance.
