## Quarta® Environment System

In order to meet the requirements of the **ISO 14.000** standard and to obtain an excellent information system supporting the environmental processes.

This module offers a tool for preventive analysis, for managing improvement, for modelling and monitoring the processes by means of indicators.

The system offers an analytical tool for identifying the prevention measures and the intervention priorities, the control and planning of the improvement of business safety.

### Software facility

- Basic files (dangers, classes, centres, categories and risk factors, single protection devices);
- Risk assessment matrixes (interpretation methods, thresholds);
- Identification of a global index of exposure to risk by tasks;
- Calculation of the accident risk index;
- Calculation of the disease risk index;
- Activity planning; Management of the corrective measures;
- Printing the dossier, with the possibility of configuring each section to be printed;
- Powerful integration with other modules of **Quarta®** (Human Resources, System Maintenance, Document Management, Designing).
