## Quarta® Project Management

This is a powerful and flexible platform for managing all the phases of a project through a Workflow drive.

Each activity contemplates an executor and a manager: each one of them can take care of the activity progress until the declaration of completion. Alarms and memos can be activated at different activity progresses by sending an automatic e-mail.

The system offers the two-way interface with **MS Project®**.

All the latest technologies representing the **Quarta®** plus are applied inside the world of design:

- management of the project documents; hierarchic folder and documents;
- multiple review index, drawing up cycle, competences, liabilities, signature traceability, controlled copies;
- automatic conversions in PDF and distribution lists, enclosures in any format;
- integration with e-mail systems: it is possible to involve project interlocutors at different levels by e-mail;
- activity scheduling: all the activities can be planned, with all the characteristic attributes of project management (estimated and real duration, start and end date, constraints, priorities, hierarchies, slack, resources);
- resource management: registry file of human and material resources with availability, competences, costs, etc.
- workflow: project status, by means of the signature by competence; automatic distribution lists;
- links between different projects: possibility of managing articulated and complex projects;
- free processes: **Quarta®** allows to model also other process types (technical change request, change of the bill of materials, investment authorisation, ...) completely configurable; these free processes can be connected together according to the priorities provided by company regulations.
